### Useful tips for preparing the design:

- Vector templates are 1:1 scale, with dimensions in millimeters, representing the final die-cut product.
- The hole punch location is marked on the drawings; consider this during design.
- Provide artwork with a bleed of at least 2 mm and at most 4 mm.
- Submitted files should not contain any guides or markings, only the print-ready artwork.
- Files should be 300 dpi, CMYK.
- For asymmetric shapes, both A and B side graphics are required.
