

Direct sublimation flag printing is a specialized method used for creating high-quality flags with vibrant colors and excellent durability. This process is performed on 110 g/m² knitted polyester fabric, which is ideal for flags due to its lightness and weather-resistant properties.

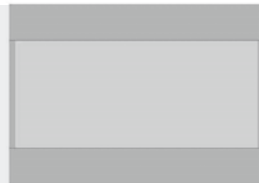

Quantity	Unit price
Minimum price (up to 1 m ²)	7.9 EUR + confection
1 – 10 m ²	7.35 EUR / m² + confection
10 – 30 m ²	6.8 EUR / m² + confection
30 – 100 m ²	6.35 EUR / m² + confection
100 – 200 m ²	6.35 EUR / m²
200 – 400 m ²	5.9 EUR / m²
400 – 1000 m ²	5.5 EUR / m²
More than 1000 m ²	5.1 EUR / m²
Cost of confection is 0.7 EUR / meter.	

Typical confections:

Hemmed all around

Hemmed all around, with a loop on any chosen side

Hemmed all around, with loop and carabiner fastening on any chosen side

Hemmed all around with reinforcement strap and grommets

Any combination of these, or custom finishing is also available upon request.

Useful tips for preparing the design:

- The maximum fabric width for printing on one side is **300 cm**
- The print undergoes heat treatment, the final dimensions may vary by **± 5%**
- Please submit the files in **CMYK** color mode, to scale **TIFF** format
- The printing is one-sided (4+0), with the design appearing on the reverse side in a mirrored format, retaining 80-90% color saturation

Packaging is done individually, labeled for each design, and folded neatly.

Cleaning is recommended with synthetic detergent, either by hand or machine washing at a maximum of 40°C in a laundry bag on a gentle cycle.

Under average conditions, these flags have a lifespan of 1-2 years, ensuring long-term usability for various promotional or decorative purposes.

The direct sublimation technology used is waterproof, making these flags suitable for both indoor and outdoor use.
