Typical confections:

Cut to size

Loop

Cut to size and grommets

welding and grommets

Any combination of these, or custom finishing is also available upon request.

Here are some common usage options for these frontlit PVC banners:

- 1. Outdoor Advertising:** Ideal for billboards, construction site signage, or fence wraps due to their weather resistance.
- 2. Event Promotion:** Frequently used for festivals, fairs, and outdoor events to display logos, sponsors, or promotional information.
- 3. Retail Signage:** Used in front of shops or malls for sales promotions or store openings.
- 4. Trade Show Displays:** Suitable for hanging banners at exhibitions, showcasing company branding.
- 5. Real Estate Signs:** Commonly used for large banners on properties or buildings for sale or lease.

Useful tips for creating the design:

- Maximum print width: **310 cm**
- Please submit the files to be printed in **high** resolution, in **CMYK** color mode.
- Please note that the grommets may extend 2-3 cm from the side into the graphic, so we do not recommend placing text or important information in that area.
